追忆 - In Search Of Lost Words - 2023

A 3D first-person perspective game that follows the story of a young person on their journey to recover their mother tongue.

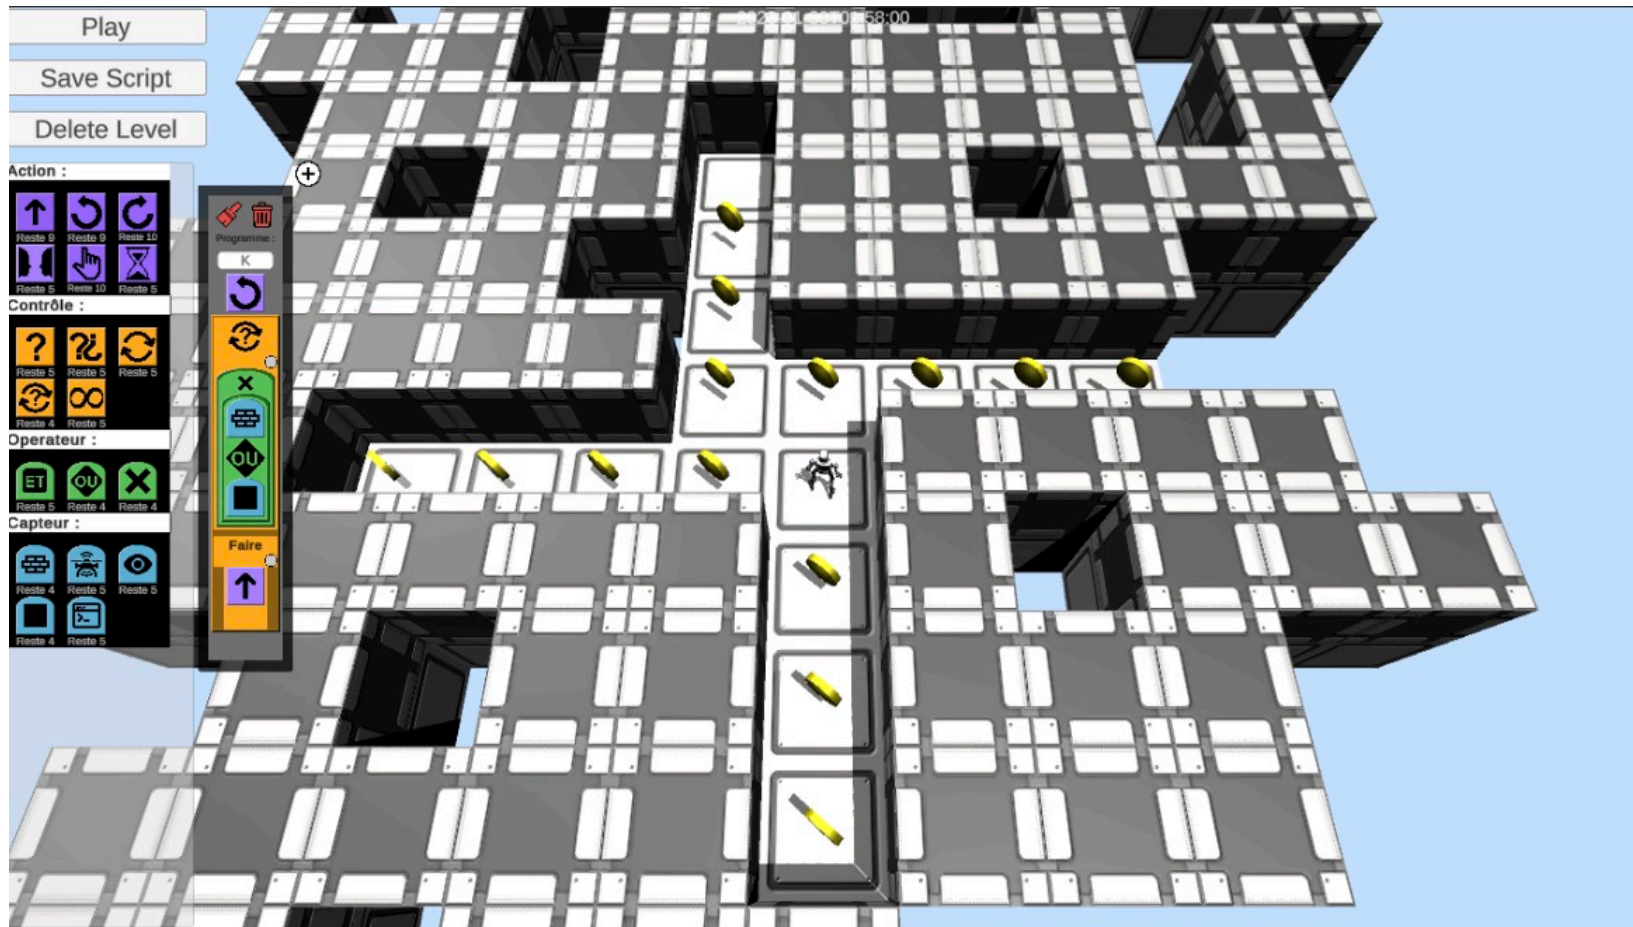

Main project of the course Highly Interactive EnVironment (EVHI)

SPY - 2023

Enhancement of an already developed serious game that teaches basic programming notions to kids.

Project of the course Engineering of Serious Games (ISG)

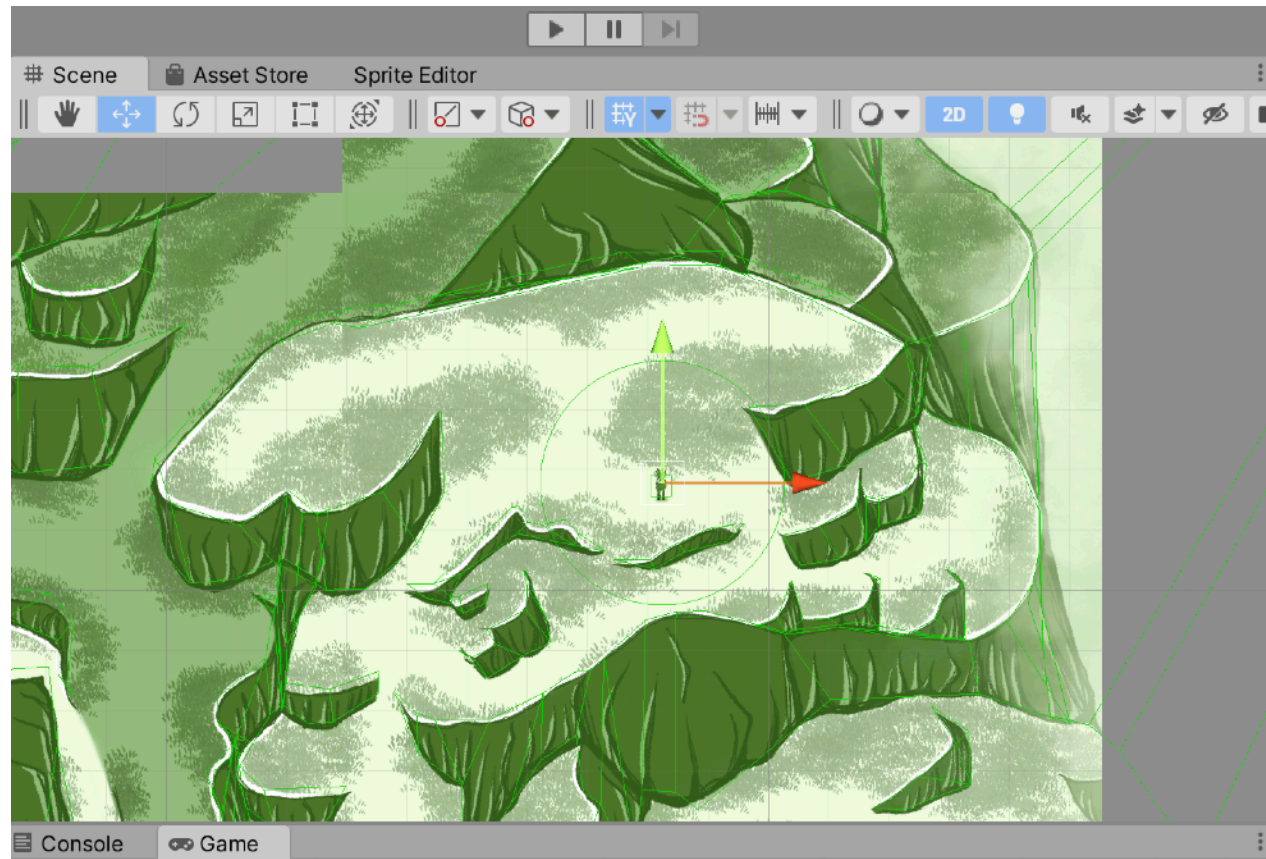

Chamois - 2022

A serious game that raises awareness of the living condition of chamois in the Bauges as well as the impact of human activities. The game is set out to show the research result of the project HUMANI at the University of Savoie.

The internship is based on the prototype already developed by a previous team of students

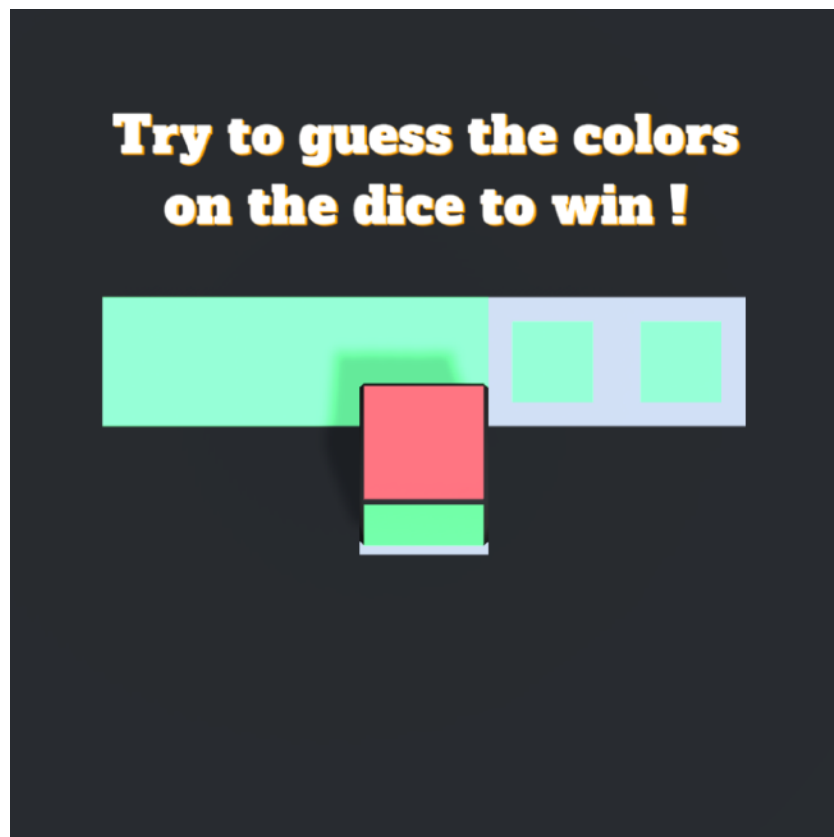

PastelDices - 2022

A puzzle game where the player memorizes the colors on a dice in order to flip onto the right side and fill the spaces with required colors.

Made in 2 days for the GMTK Game Jam 2022

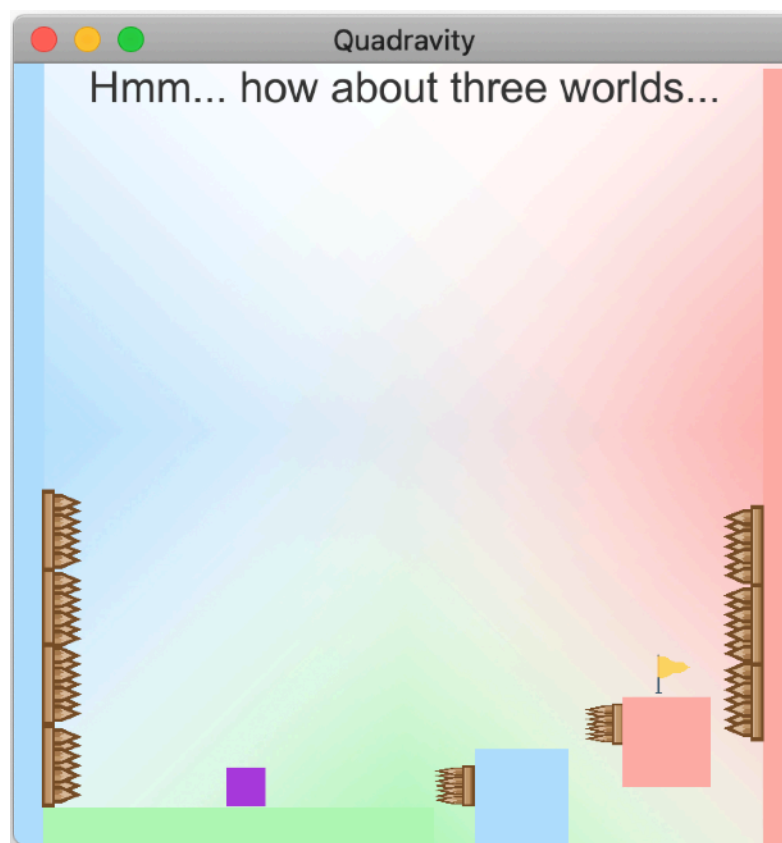

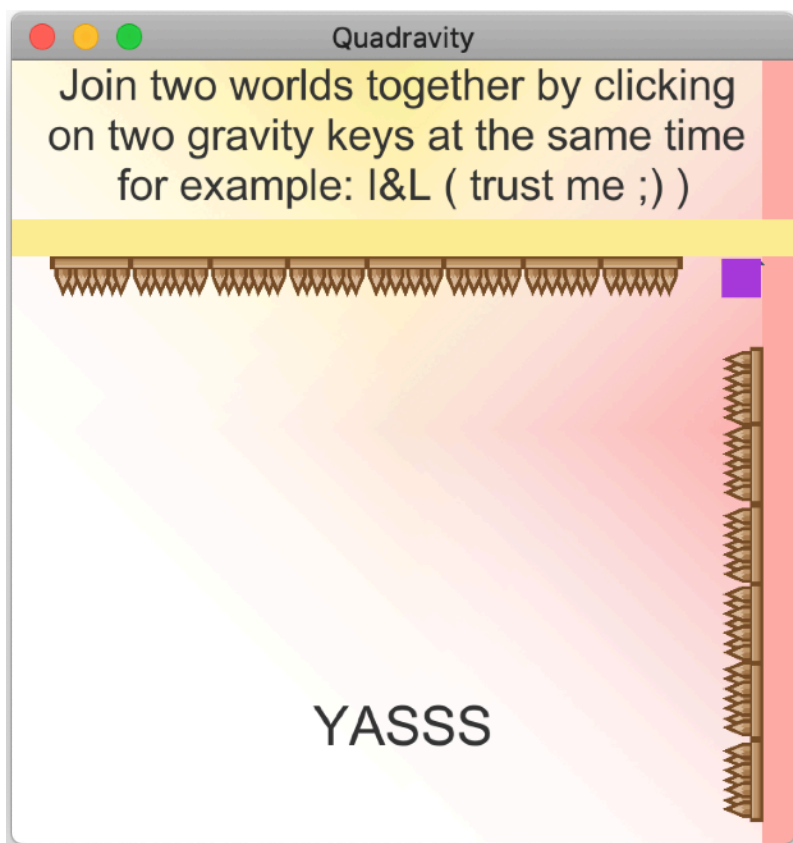

Quadravity - 2021

A puzzle game where the player merges worlds together in order to make objects appear and change the gravity (QWERTY keyboard required)

Made in 2 days for the GMTK Game Jam 2021

Creative Document - 2021

Conceptualization of an educational game on the history of tissue and humanity (made for an entrance exam of ENJMIN)

Mood board:

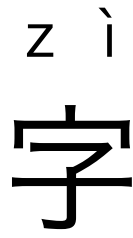

Splatable - 2021

Adaptation of the game Splatoon to a board game, made on Google Sheets with AppScript

The screenshot displays the Splatable Google Sheet interface, which is a board game adaptation of Splatoon. The interface is divided into several sections:

- Map:** A large grid on the left shows the game map with blue and red areas representing different teams. The map is labeled with letters A through Z and numbers 1 through 30.
- Game Rules:** A central panel lists the game rules and actions:
 - 3 actions par tour
 - peindre 1 par tour
 - se montrer = 0 action
 - cacher = 1 action
 - peindre = 1
 - bouger = 1
 - transporter = 3
 - mort = 3
- Player Positions:** A section on the right shows the positions of the four players: Thomas (blue), Nico (blue), Raph (red), and William (red). Each player's position is represented by a small icon and a number.
- Game State:** A section on the right shows the current game state, including the number of actions remaining for each player and the current turn.

- Board Game - 2020

A 1v1 strategy game that introduce some Chinese characters.

Inspired by one of the Chinese input method on iPhone and the systemic mechanic of Breath Of The Wild
